

# Employee Sentiment Survey Questionnaire

## 1. Introduction

This document provides a series of questions that you may ask employees undergoing Job Redesign, to understand their sentiments on current jobs, common pain points and career aspirations. These responses can help the project team identify processes that need to be reviewed, and equipment or technology that can support role-holders as they carry out their new roles.

## 2. Participant Demographics

You may consider collecting the following information from the survey participants to track completion rates and understand trends seen across different employee demographics. As you collect these details, please continue to assure the participants that their responses will be kept anonymous, in order to encourage participants to respond truthfully.

The following demographics may be helpful for you:

- Current Job Role
- Gender
- Age
- Nationality (e.g., Singaporean/PR/Non-Singaporean/Non-PR)
- Tenure
- How long have they worked in the Community Care Sector

## 3. Potential List of Survey Questions

You may consider including the following survey questions when developing your Employee Sentiment Survey Questionnaire. Please note that the questions and answers are non-exhaustive, and you may choose to include other questions that might better suit your needs.

The survey questions revolve around the following themes, otherwise referred to as “Dimensions”:

- Engagement / JR opportunities
- Training and Technology Implementation
- Retention / Career Aspirations

### 3.1 Survey Questions – Engagement / JR Opportunities

Suggested questions and options include:
